- H2 STATION CHARGE: 5 hours with USB, 10 hours with solar panel

SMARTPHONE CONTROL

No extra batteries required: the refueling station is recharged using either a solar panel (included) or a USB / PC connection.

Solar panel

Pump

PC with USB port

(cable included)

i-H2GO runs on hydrogen fuel cells, fueled up using a real-working hydrogen station. The station can be powered up using either a solar panel (included) or a USB cord to plug into your PC. Once it is ready – the car's fuel tank can be filled up within one quick pump action!

H₂O

O₂

H₂

Oxygen will be released back into the air

Hydrogen is the energy that will be converted to electricity using a fuel cell located at the center of the i-H2GO
