

H2GP SPRINT CAR KIT

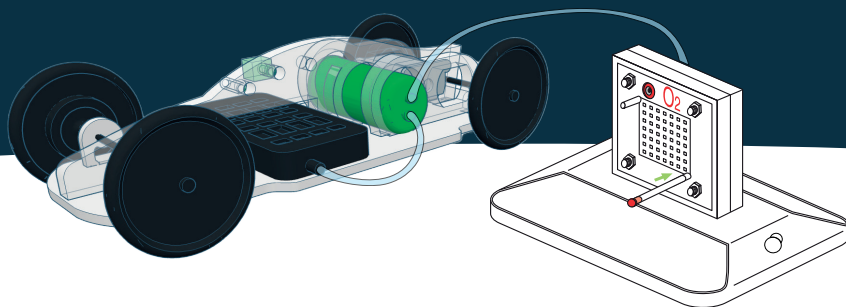

RESK-03-1

PRODUCT DESCRIPTION

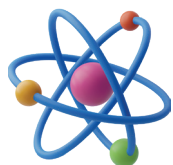

The H2GP SPRINT car is a 1:20 scale hydrogen-powered car used to demonstrate hydrogen technology to students aged 10-15. Students receive all the components they need to assemble this car (including a chassis, fuel cell, electrolyzer, wheels and motor), constructing the car with the help of an activity guide. After racing the car against their peers, students are free to experiment with 3D design, updating the gear-to-wheel ratio, car weight distribution, or even designing the entire chassis with digital modeling software.

FEATURES

- ▶ **STEM in a creative and open-ended way**
- ▶ **All-in-one ELECTROLYZER**
- ▶ **ACTIVITY guide**

CONCEPTS COVERED

PHYSICS

Laws of motion
Electricity
Data evaluation

EARTH / ENVIRONMENTAL SCIENCE

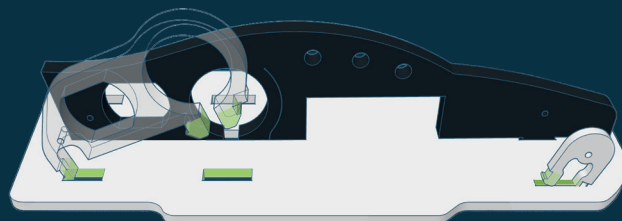

Human Impacts on Global Climate Change
Alternative Energy Sources

CHEMISTRY

Reactions: Catalytic and Redox
Alternative Energy Sources

INCLUDED COMPONENTS

- 1X** 1.5W Hydrogen Fuel Cell
- 1X** PEM Electrolyzer
- 1X** Chassis Kit (including Chassis, Axle holder, x 2 Tubing Holder, 2 x Motor and Tank Holder, Central Holder)
- 2X** AA Battery Holder + Banana Plugs
- 1X** 1.2 V Electric Motor
- 1X** Purge Valve
- 1X** Gas Tank
- 2X** 7cm (2.8 inch) Axle
- 4X** Rubber Tire
- 4X** Wheels (Including Wheel 50-8, Wheel 42-16, Wheel 44-14, Wheel 48-10)
- 2X** Spur Gear (Spur Gear 8, Spur Gear 10)
- 1X** 45cm (17.7 inch) silicon tubing
- 1X** White Valve Clip
- 1X** Green Male Valve
- 1X** Green Female Valve
- 1X** 5ml Syringe
- 1X** Electrolyzer plate

**ALSO AVAILABLE
AS CLASSROOM
